EQUIPMENT & SERVICES OVERVIEW

CATEGORY

DESCRIPTION

Studio

Flexible stage environments at Ealing Studios, suitable for productions of all scales with full supporting infrastructure.

Virtual Production Stage

Real-time virtual production solutions combining LED environments, motion control and camera tracking to create immersive, in-camera visuals.

TechnoDolly / Grip

Robust grip equipment providing stability, movement and creative camera support for complex and dynamic shots.

AI & Post Production

Advanced tools and workflows for post production, data handling and AI-driven enhancements to streamline delivery and innovation.

Camera

Camera equipment and accessories built to support seamless on-set workflows and creative control.

Video

End-to-end video solutions including monitoring, playback and on-set workflows to support efficient production and review.

Lighting

A versatile range of lighting equipment to shape, enhance and elevate every scene, from studio setups to on-location shoots.

Ancillary

Supplementary kit and specialist equipment to support unique production requirements and bespoke setups.

Power

Reliable power distribution and infrastructure solutions to keep productions running safely and without interruption.

Photography

Specialist equipment for stills capture, unit photography and behind-the-scenes content creation.

Audio

Professional audio solutions for high-quality sound capture and monitoring.

Transport

Efficient transport and logistics services ensuring equipment and crew are delivered on time and production-ready.

Comms

Integrated communication systems enabling clear, reliable coordination across departments and locations.
